

The BK2000 How to Guide

Note: The following pages have been taken from The BK's Owner's Manual.

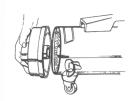

Ta	Page	
1.	Disposable Bag Removal/Replacement	2
2.	Filter Removal/replacement	2
3.	Assembling and Using the Power Head	3
4.	Assembling and Using other Attachments	3
<i>5</i> .	Troubleshooting your BK2000	4

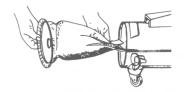

1. Disposable Bag Removal/Replacement

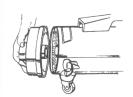

1. Use genuine AlleRx bags only; failure to do so will void warranty immediately. Unplug the power head.

2. Remove the front-end bell by first releasing the front-end clamps.

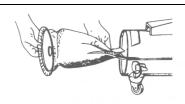

3. Remove the bag from the unit and replace it with a new AlleRx bag.

4. Replace the front-end bell and fasten the front-end clamps. TOP label on the front-end bell should face up.

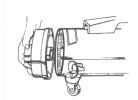

2. Filter Removal/Replacement

1. Use genuine 3-way filter assembly only; failure to do so will void warranty. Remove the front-end bell and bag by following the instructions above.

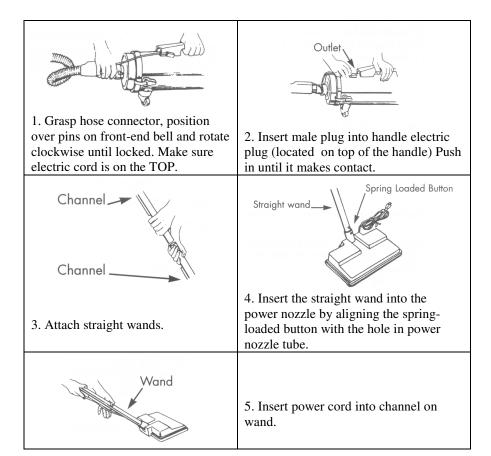

2. Remove and discard the used filter. Place 3-way filter assembly with charcoal/carbon filter facing motor.

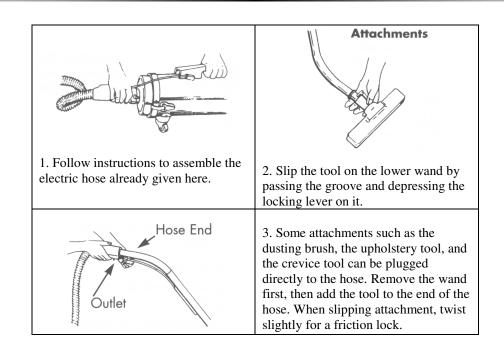

3. Replace the bag, then the front-end bell and finally fasten the front-end clamps.

3. Assembling and Using the Power Head

4. Assembling and Using other Attachments

5. Troubleshooting your BK2000

Problem	Possible Reason(s)	Possible solution(s)
Caution: to reduce the risk of personal injury, UNPLUG the unit before servicing it.		
Cleaner won't run	 Power cord not plugged into outlet Blown fuse or broken switch 	Plug unit in firmly Replace part
Cleaner shuts off suddenly	1. Heat sensor detected excessive heat and turned off the unit automatically	1. Unplug, wait 30 min, press switch twice and resume cleaning
Cleaner won't pick up	 AlleRx bag is full or missing Broken or worn belt Clogged 3-Way filter assembly Power nozzle to hose passage is clogged 	 Replace bag Replace belt Replace filter Remove nozzle, remove obstruction from nozzle or from hose
Tools won't pick up	Hose clogged AlleRx bag or 3-way filter assembly clogged Handle cord not properly connected	Remove tool, remove obstruction Replace bag or filter Make sure cord makes full contact w/unit
Dust escaping from cleaner	AlleRx bag is not installed properly, punctured, or missing	1. Replace bag and filter assembly
Brushroll is not rotating	Belt missing or not assembled properly Brushroll clogged or bound with hair or string Worn Brushroll Bearings	Replace belt Remove clog, cut & remove hair and string Replace brushroll bearings
Belt burns/breaks	Clogged or partially clogged brushroll	Refer to "Brushroll is not rotating" above
Any other servicing should be done by an authorized service agent
